SWAPUP PARTNER OPERATIONS MANUAL

Buyback Partner Rate Cards, Pickups & Settlement Guide

Schema & Full CSV Specs • Upload Steps (/partner/rate-cards) • Team & QC Verdicts • Payout Settlement

1. Ready-to-Upload Rate Card CSV Specifications

SwapUp supports both 6-column grade-tiered pricing sheets and 3-column ceiling sheets. When PriceIQ has no refurbished market price (or market data is >90 days old), the counter automatically prices trade-ins from the Buyback Partner's active rate card.

Option A: Full Catalogue 290-Row CSV (Built Into App)

- **Pre-Built Download:** Download /samsung-apple-rate-card.csv directly from the Rate Cards screen, or click 'Download blank template' (/api/partner/rate-cards/template) while logged in to export every active catalogue model_id and variant.

Option B: 6-Column Grade CSV (Superb / Good / Fair / Best Value)

Save as UTF-8 .csv or paste directly into the upload text box. Leave optional grade columns blank if not pricing a tier:

```
model_id,variant,max_price,good_price,fair_price,best_value_price
galaxy-s25-ultra,256GB,63100,58100,51700,44200
galaxy-s25-ultra,512GB,68600,63100,56300,48000
galaxy-s25,128GB,37700,34700,30900,26400
galaxy-s25,256GB,41700,38400,34200,29200
galaxy-s24-ultra,256GB,52400,48200,43000,36700
galaxy-s24,128GB,30900,28400,25300,21600
galaxy-s23-ultra,256GB,43500,40000,35700,30400
galaxy-s23,128GB,25400,23400,20800,17800
galaxy-z-fold6,256GB,53700,49400,44000,37600
galaxy-z-flip6,256GB,32300,29700,26500,22600
```

Option C: 3-Column Ceiling CSV (Grade A / Best-Condition Only)

Grades B, C, and D are calculated from max_price using your configured Condition Deductions:

```
model_id,variant,max_price
galaxy-s25-ultra,256GB,63100
galaxy-s25,128GB,37700
galaxy-s24-ultra,256GB,52400
galaxy-s23-ultra,256GB,43500
galaxy-s23,128GB,25400
```

Strict CSV Validation Rules (Enforced by UI & Server)

1. Exact Catalogue Match: model_id and variant must match SwapUp's trade_models catalogue (no duplicate model_id + variant rows).
2. Whole Rupees Only: Integers > 0 without formatted commas or paise (write 63100, never 63,100.00).
3. Monotonic Grades: Lower grades cannot pay more than higher grades (max_price >= good_price >= fair_price >= best_value_price).
4. No Neighbour Substitution: Unlisted models/variants return 'unpriced'—never borrowed from another model.

2. Step-by-Step: Uploading a Rate Card (/partner/rate-cards)

- **Step 1 — Navigate to Rate Cards:** Sign in as a Buyback Partner (role: partner) or Platform Super-Admin (role: platform) and open /partner/rate-cards. Platform staff can select the target partner via ?partnerId=.
- **Step 2 — Enter Sheet Metadata:** Fill Card name (minimum 3 characters, e.g., 'Partner Sheet — Week 46'), Effective from (YYYY-MM-DD), and Quote valid for (1 to 30 days).
- **Step 3 — Load or Paste CSV:** Click 'Load a .csv file' to import your file, click 'Load all Samsung & Apple phones (290 rows)' to auto-populate the full catalogue, or paste CSV text directly. Review the live validator pills ('priced', 'without a price', 'to fix') and click 'Remove rows without a price' if needed.
- **Step 4 — Configure Condition Deductions (0–100%):** On your first upload, enter % deductions for every condition group—or click 'Start from SwapUp's percentages', verify each figure, and check 'These are our own deductions.' On later uploads, choose 'Keep the active card's deductions' or click 'Change deductions' to adjust.
- **Step 5 — Activate & Publish:** Keep 'Make it active now' checked (existing locked quotes preserve their original price) and click 'Upload rate card' (POST /api/partner/rate-cards).

3. Condition Deduction Reference (SwapUp Default Baseline)

Each percentage applies against the device's ceiling price, floored to Rs.1 per line, capped at maxDeductionBp (85%), floored at floorBp (6% for SwapUp default / 5% on newly created partner sheets), and rounded down to Rs.10:

Category	Condition / Defect	Default %
Power & Calls	Does not switch on (deadBp — priced on this line + accessories/age)	**75%**
Power & Calls	Calls / network not working (callsBp)	**20%**
Screen	Flawless: 0% | Scratched: 6% | Lines/spots: 35% | Cracked: 40% | Not working: 65%	**0% – 65%**
Body	Flawless: 0% | Scuffed: 3% | Dented: 12% | Back cracked: 15% | Bent: 35%	**0% – 35%**
Functional	Liquid: 45% | Touch: 30% | Rear cam: 18% | Wi-Fi/BT: 15% | Charging: 12% | Front cam: 10%	**10% – 45%**
Functional	Battery: 9% | Fingerprint: 8% | Speaker: 7% | Mic: 7% | Buttons: 6% | Vibration: 3%	**3% – 9%**
Accessories	No charger: 3% | No box: 2% | No purchase bill: 3%	**2% – 3%**
Device Age	Under 3 months: 0% | 3 to 11 months: 4% | Over 11 months: 8%	**0% – 8%**

4. Partner Operations: Team, Pickups, QC & Settlement

- **Manage Pickup & QC Team (/partner/team):** Create and manage partner field pickup agents and inspection/ QC staff accounts scoped strictly to your partner organisation.
- **Execute Pickups (/pickups):** Review store pickup manifests containing locked trade-in devices. Verify physical IMEIs at handoff and mark the manifest as 'collected'. (If the retail org's credit release rule is 'collected', store credit replenishes immediately.)
- **Inspect Devices & Issue Verdicts (/partner):** Compare each collected phone against its frozen, SHA-256-fingerprinted Grading Report (/r/[token])—including exterior photos, hardware test logs, and disclosures—then submit either 'cleared' (accepted as quoted) or 'regraded' (with shortfall & written reason).
- **Settle Payouts Back to Retail Orgs/Stores:** Reconcile cleared and regraded device payouts back to the retail org/store. Finalizing clearance also frees store credit capacity when the org's release rule is 'cleared'.

Chargeback Cap Protection

When a device is regraded during Partner QC, chargeback deductions can ONLY reduce against the Partner's Market Trade-In Price—never against SwapUp's Premium top-up or the Retail Org's Campaign Upgrade Bonus.
